

REVOLUTIONARY LIFE CHANGE

With STEMTech, Gabrielle Godling is experiencing financial success and the best health of her life.

WHEN GABRIELLE BEVERLY GODLING FOUND STEMTECH AND ITS REVOLUTIONARY PRODUCT, STEMENHANCE, she had dedicated two decades of her life to wellness and healthy living.

For Gabrielle, her healthy way of life did not come naturally but was her response to living through the effects of an unhealthy lifestyle and serious health problems. “I had

experienced a lifetime—28 years—of being unhealthy,” she says. “I was living a truly unhealthy life, taking many medicines and spending a lot of time in the hospital and the medical doctor’s office.” Her wake-up call came in 1986. “I had several major traumas in my life that compromised my health,” she says. “I was extremely uncomfortable and felt that it was more than I could tolerate.”

For the 20 years that followed, Gabrielle devoted her time and efforts to creating the daily living habits of eating properly and building a career in the network marketing industry. Despite her efforts, she was unable to actively involve herself in a successful network marketing company until she received a phone call from a friend about STEMTech’s product, StemEnhance®, in 2005. “In everything I do I use my intuition, and this con-

cept sounded so utterly amazing that it took me 10 seconds to determine that I wanted to try it," Gabrielle says. "I listened in on conference calls that STEMTech offered and heard sincere people from all over the country explain how their lives had changed with StemEnhance. In addition, there was absolutely no hype to this product, just scientific proof. That prompted me to eagerly start sharing this concept with others."

Lifestyle Change

Because of her continuing health challenges, Gabrielle began building her STEMTech business by making calls while lying in bed. "I had no energy," she says. "But every phone call I made was a total success with the exception of one."

After she received her first shipment of StemEnhance, Gabrielle immediately began to see a difference in her health. "I chose to saturate my body," she says. "I have found that this revolutionary product has changed my life forever. It was the only product I was putting into my body at the time, and I began to feel more energy and vitality."

Gabrielle admits that not everyone will experience the same results she did, but she believes in the power of the product. "I believe wholeheartedly that I wouldn't be here today were it not for StemEnhance," she says. "I cannot remember when I have been more mentally alert, energetic or felt so capable to engage in even more activities than I could when I was younger. I

wouldn't be experiencing the increased energy or the extreme financial security that enables me and others to live such fulfilling lives."

life forever.**

The Security to Give

Gabrielle's financial security has affected more than her way of living. Although she lives comfortably in sunny Florida only 100 yards from the beach and drives a BMW that she earned through her work with STEMTech, her financial security stretches beyond her lifestyle. "You cannot help others if you do not have the financial stability to do so," she says. "Financial security has allowed me to help more people and give to my favorite charity. The most incredible experience, though, is that I can help others achieve their dreams if they are willing

to put forth the effort. It makes me feel like I'm living my mission because I always wanted to help others with their health and ultimately with their financial success. With STEMTech I can offer that."

Life on Her Terms

Success with STEMTech has given Gabrielle the freedom to live how she chooses. "I enjoy my own schedule," she says. "In the beginning of building my organization I had to focus and dedicate my time only to building. Now I have more time to do what I enjoy doing."

Reflecting on her accomplishments, Gabrielle sees how her journey to success, although difficult, will affect those she helps in the future. "Now that my faith has strengthened, I am so grateful that I can offer a more positive attitude," she says. "I can now remain open to all of the possibilities that enable me to help others and to live a much more prosperous, healthy and balanced life. I can be an example to others who need not experience the health challenges or financial woes as I did before I discovered StemEnhance." **YB**
